Using ContextEdit ----- Let us go through a simple example of how ContextEdit can help in the editing of context menu entries. Assume you have two entry names, "File menu" and "Edit menu". You want to change their order such that the "Edit menu" comes before the "File menu" in the "Main Menu". [Changing the order of the context menu entries](contextmenu-images/contextmenueentrychangeside.jpg)(contextmenu-images/contextmenueentrychangeside.jpg) To do this, let us first right-click on the "Main Menu" and select "Edit Menu". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit1.jpg)(contextmenu-images/contextmenuemuedit1.jpg) Let us now choose "More" > "Move up" > "Up". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit2.jpg)(contextmenu-images/contextmenuemuedit2.jpg) At this point, the order of the context menu entries has been changed to "Edit" > "File" > "Save". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit3.jpg)(contextmenu-images/contextmenuemuedit3.jpg) If you want to revert to the original order of the context menu entries, then you need to right-click on the "Main Menu" and select "Edit Menu" again. Now you can choose "More" > "Move down" > "Down". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit4.jpg)(contextmenu-images/contextmenuemuedit4.jpg) You can even select the "Edit" > "File" > "Save" > "Move down" > "Down". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit4.jpg)(contextmenu-images/contextmenuemuedit4.jpg) You can even select the "Edit" > "File" > "Save" > "Move down" > "Down". [Editing the "Main Menu"](contextmenu-images/contextmenuemuedit4.jpg)(contextmenu-images/contextmenuemuedit4.jpg) 82157476af
